

Duration 60
mins

Materials Required: pens/pencils, template

Aim: To design a helmet to wear when you are cycling or scooting . It is important that this helmet keeps you safe and protected but you can design it anyway you want.

You get lots of different types of helmets out there – why not do some research into different types of helmets to get some inspiration.

You can use the helmet template attached, or if you would like to come up with a completely different template you can.

We look forward to seeing your helmet designs—good luck!
